Vehicle is not value for money

Top Expert Review

Recently, Mahindra launched the Scorpio facelift - basically a mid-life update of the current generation SUV. With the facelift, Mahindra has skipped making any major updates on the exteriors or interiors, but has decided to alter the drivetrain to make this the most powerful Scorpio yet. So, do the added power and new transmission make any significant changes in drivability, especially when it has been the major strength of the SUV in the first place?

Not much to cover here. The grille has let go of the whiskers and now wears 7 slats adopted from the Imperio pickup. Sounds familiar to any other well known SUV brand? Anyway, it does make the Scorpio look more imposing which goes hand in hand with its generous proportions. It also gets a slightly tweaked bumper with new fog lamps with cornering function to complete the new front look.
